

Video Surveillance (CCTV) & Thermal Imaging

opticsecuritygroup.com

A CLEAR VIEW OF YOUR WORLD

Manage a single location or multiple sites? High resolution, IP video surveillance is not only an effective deterrent, but it's also a powerful tool for capturing and documenting all manner of events on your premises, giving you a detailed level of visibility and insight into your business, to help optimise your operations.

Thermal cameras let people see what their eyes can't: invisible heat radiation emitted or reflected by all objects, regardless of lighting conditions. Whether you are looking to capture workforce or public space body temperatures to ensure appropriate health and safety, or to monitor security in poor lighting situations, dynamic thermal imaging can help you mitigate issues in real time.

KEEP YOUR PEOPLE, VISITORS AND ASSETS SAFE – IN THE CLOUD AND ON PREMISE

24/7 visibility

View all aspects of sites and operations with full HD video.

Integrate with other security systems e.g. access control / intruder detection. Single pane of glass view.

Built-in analytics

Utilise insights and smart data to alert your team to issues.

Optimise operations and keep track of customers & team members, to enhance health & safety plus optimise operations efficiency.

Securely stored

Ensure encryption, access rights and privacy of your video surveillance data and comms, from unauthorised systems and personnel.

Use secure cloud storage for back up and reference.

BUSINESS BENEFITS

- Video and data analytics to optimise broader operations – not just security
- Sophisticated algorithms and pixel by pixel analysis to note the smallest of details
- Multiple scenario uses – traffic flow/queue or entry management, numberplate recognition, object detection & tracking
- Facial recognition
- Loss prevention
- Premises layout, stock management, foot traffic hot spots
- Resource planning
- Cover larger areas, camouflage issues & movement undetected by human eye (thermal imaging)

WE WILL

Understand your security needs

- By understanding your business aims and operation flows, we can help design security solution that works for you, your employees, suppliers and contractors.

Complete on site and network audits and surveys

- Optic converged security specialists will audit your building (s) and all access points in conjunction with any existing security measures.

Review of recommendations and options

- Optic will discuss with your team the recommended approach, products and how best to train your staff in best practice management for your purpose designed solution & bespoke deployment

WE ARE OPTIC

Optic Security Group is Australasia's largest independent provider of converged security (physical, personnel and information) risk management solutions, and we've been doing it for over 30 years.

We are excited to partner with you in establishing and enhancing your security risk strategy and governance, and in designing, integrating, installing, maintaining and servicing networked security systems.

MARKET LEADING PRODUCTS AND APPS

Optic Security Group partners with, supplies and installs the latest innovative products and platforms. We will assist you in creating the right solution for your situation.

THERMAL SCANNING FOR TEMPERATURE SCREENING AND PERIMETER SURVEILLANCE

Accepted throughout the security industry as the best 24-hour visual surveillance option on the market, thermal imaging cameras are an integral component in effectively securing borders, airports, seaports, critical infrastructure, large retail locations, health or education facilities and more.

Combined with advanced analytics, thermal cameras have superb range performance, cover larger areas than standard camera arrays, can overcome camouflage issues and highlight movement that the human eye cannot detect.

A QUALIFIED SECURITY PROFESSIONAL TO DESIGN YOUR SECURITY SOLUTION

In accordance with our **Enterprise Security Risk Management (ESRM)** approach, our methodologies and solutions are aimed at lowering your exposure to security risks that could affect your organisation operationally, financially, or reputationally. We deliver risk-based – not product-based – solutions.

We will work closely with your Security and IT team to ensure security solutions are fit-for-purpose in terms of selection, design, deployment and maintenance, including regular risk, threat and vulnerability assessments and converged security audits.

We will ensure our delivery is also de-risked and reliable, including in relation to the availability of security product (supply chain) and equipment (including PPE), and appropriately qualified and experienced technical personnel, and Business Continuity Planning.
