

Converged Security Risk Assessment

WHAT IS CONVERGED SECURITY

Converged Security describes what the emerging security risks of today look like. As the world becomes more networked, the lines between digital and physical threats are blurring.

To address the converged security threats of today and tomorrow, Optic Security Group provides **fit-for-purpose security solutions**.

PROTECT YOUR 4 SECURITY DOMAINS

Risk Management	IT Solutions	Digital Security	Physical Security
Ownership of security risk across the business	IT enablers	Information & cyber protection	Physical elements
Threat/risk assessments Staff Training Policies Security Risk Management Business Continuity Planning	Cloud services IT-as-a-service Remote/WFH solutions Video conferencing IT professional services to secure operational, business continuity	Firewalls Networking Monitoring of traffic & behaviour Analytics Reporting & alerts Monitoring of external threats Application & infrastructure testing	CCTV Video management systems Access control – cards/pin pads/biometrics/thermal imaging Remote worker safety Asset tagging/tracking Other physical threats

BUSINESS BENEFITS

- Solutions are fit-for-purpose in terms of selection, design, deployment and maintenance
- Regular risk, threat and vulnerability assessments and converged security audits included
- We ensure delivery is also de-risked and reliable, including in relation to the availability of security product (supply chain) and equipment (including PPE)
- Only appropriately qualified and experienced technical personnel partner with you
- Business Continuity Planning for future proofing your solution

WE WILL

Understand your security needs

- By understanding your business aims and operation flows, we can help design security solution that works for you, your employees, suppliers and contractors.

Complete on site and network audits and surveys

- Optic converged security specialists will audit your building (s) and all access points in conjunction with any existing security measures.

Review of recommendations and options

- Optic will discuss with your team the recommended approach, products and how best to train your staff in best practice management for your purpose designed solution & bespoke deployment

WE ARE OPTIC

Optic Security Group is Australasia’s largest independent provider of converged security (physical, personnel and information) risk management solutions, and we’ve been doing it for over 30 years.

We are excited to partner with you in establishing and enhancing your security risk strategy and governance, and in designing, integrating, installing, maintaining and servicing networked security systems.

A QUALIFIED SECURITY PROFESSIONAL TO DESIGN YOUR SECURITY SOLUTION

Optic works with over 1,000 clients across New Zealand and Australia, and we know from experience that there is no such thing as a 'standard' organisation and virtual businesses operate differently.

We work with your team to identify the physical and cyber - or converged - risks across your organisation and recommend a customised plan to suit your situation.

We recognise that the increased use of digital technologies and assets has grown exponentially over the last decade and increasingly digital is part of the success plans for many businesses. This has changed how organisations assess 'risk' to their people, information and physical assets.

Along with an updated review of the security already in place, Optic can help test your converged (physical and digital) defences, giving you a broad overview of not just what might be an issue, but also how well protected you are. With that knowledge, it then becomes far easier to work on a plan and budget to suit your specific needs.

A QUALIFIED SECURITY PROFESSIONAL TO DESIGN YOUR SECURITY SOLUTION

In accordance with our **Enterprise Security Risk Management (ESRM)** approach, our methodologies and solutions are aimed at lowering your exposure to security risks that could affect your organisation operationally, financially, or reputationally. We deliver risk-based – not product-based – solutions.

We will work closely with your Security and IT team to ensure security solutions are fit-for-purpose in terms of selection, design, deployment and maintenance, including regular risk, threat and vulnerability assessments and converged security audits.

We will ensure our delivery is also de-risked and reliable, including in relation to the availability of security product (supply chain) and equipment (including PPE), and appropriately qualified and experienced technical personnel, and Business Continuity Planning.
