# Access Control & Perimeter Security

[opticsecuritygroup.com](http://opticsecuritygroup.com)

## KEEP BUILDINGS AND ASSETS SAFE WITH INTEGRATED ACCESS CONTROL & PERIMETER SECURITY

Offering the latest technology in access control & perimeter security we can protect your people, information and assets.

Optic can design, install and maintain an access control system that enables you to manage and monitor your premises including restricted areas. With specialist licensing and a trusted partner to defence, education, health facilities, industry and government departments across Australia and New Zealand your security is as important to us as it is to you.

## SMART PHONE APPS, BIOMETRICS, CARDS - CHOOSE WHAT WORKS FOR YOU

Gates, doors, car-parks, rooms or stairways, if you need to regulate access to & within your premises Optic Security can design a system to suit. We can also include an audit and documentation report of who was where and when – all via re-programmable cards and other technology removing the need for keys and other costly hardware.

Access control & Perimeter security systems can also be integrated across other multiple systems including your HR databases, intruder systems, door lock management and video surveillance giving you a holistic picture and greater control of people movement around your buildings.

### BUSINESS BENEFITS

- No more lost or duplicated keys!
- Immediate replacement or updates via software integration
- Protection for your employees, visitors, residents from unauthorised visitors
- Activity monitoring and reports – keep tabs on who was where and when
- Remote access control and controlled times for when you can't be there
- Energy management – unoccupied building room lighting and HVAC control

### WE WILL

#### Understand your security needs

- By understanding your business aims and operation flows, we can help design security solution that works for you, your employees, suppliers and contractors.

#### Complete on site and network audits and surveys

- Optic converged security specialists will audit your building (s) and all access points in conjunction with any existing security measures.

#### Review of recommendations and options

- Optic will discuss with your team the recommended approach, products and how best to train your staff in best practice management for your purpose designed solution & bespoke deployment

### WE ARE OPTIC

Optic Security Group is Australasia's largest independent provider of converged security (physical, personnel and information) risk management solutions, and we've been doing it for over 30 years.

We are excited to partner with you in establishing and enhancing your security risk strategy and governance, and in designing, integrating, installing, maintaining and servicing networked security systems.

Your Security Risks. Managed

MARKET LEADING PRODUCTS AND APPS

Optic utilises industry leading products from manufacturers such as Gallagher, Inner Range, and Assa Abloy just to name a few...

We will *train your team* how to best manage your system, as well as manage service, maintenance, updates and reporting to simplify the process of your security solution.

Prox reader, Mag strip card, fingerprint, fob, smartphone, PIN

READERS

Card Reader, fingerprint scanner, receiver, keypad. Converts creds to unique ID number

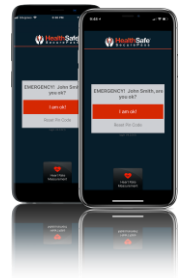

CONTROL PANEL

Compares ID to approved whitelist

DOOR LOCKS

Disengage if ID is approved

A QUALIFIED SECURITY PROFESSIONAL TO DESIGN YOUR SECURITY SOLUTION

In accordance with our **Enterprise Security Risk Management (ESRM)** approach, our methodologies and solutions are aimed at lowering your exposure to security risks that could affect your organisation operationally, financially, or reputationally. We deliver risk-based – not product-based – solutions.

We will work closely with your Security and IT team to ensure security solutions are fit-for-purpose in terms of selection, design, deployment and maintenance, including regular risk, threat and vulnerability assessments and converged security audits.

We will ensure our delivery is also de-risked and reliable, including in relation to the availability of security product (supply chain) and equipment (including PPE), and appropriately qualified and experienced technical personnel, and Business Continuity Planning.
