

OPTIC DIGITAL

IT-as-a-Service (ITaaS)

opticsecuritygroup.com

OUTSOURCE YOUR IT AND DIGITAL EXPERTISE

Do you need IT and technology support, but don't want to employ a full time team? Or maybe you do some of your IT, but don't have expertise in every area. We can help.

At Optic Digital we deliver your technology services so you can focus on what you do best.

We provide managed services, support, and service desk functionality; along with procurement services and expertise in a wide range of technologies, including the provision of IaaS and other cloud solutions – using both private and public clouds with all the security you need built in.

With offices across NZ and Australia, working with industry leaders including Microsoft, Fortinet, Cisco Meraki, Veeam, HP, and others - we are a trusted partner to a wide variety of government, corporate as well as small-medium organisations.

NO HASSLE, PLAIN SPEAKING, EXPERT HELP, AS AND WHEN YOU NEED IT

We are successful when your business hums.

Our aim is to enable you to get on with delivering a great service to your customers knowing your technology operations are being looked after by a passionate, friendly and experienced team.

We have extensive experience across consulting, architecture, security, cloud, programme and project management, data and analytics, business analysis, testing, development, and engineering.

We've got all the skills you need, when you need them.

GET PEACE OF MIND WITH YOUR OUTSOURCED IT PARTNER

Let us show you how working with Optic Digital is a cost effective approach for getting the IT experience you need without the challenges of having to do it all in-house, or having to manage lots of contracts. Optic Digital is part of Optic Security Group - Australasia's leading converged IT and security service provider. Optic provides IT-as-a-Service as a standalone offering or as part of an enterprise-wide security and IT services portfolio.

EVERY BUSINESS IS DIFFERENT – TALK TO US ABOUT YOURS

Optic Digital can provide a breadth of technology services and the best part is you can pick and choose what you need. It's like having your own team, but only when you need them. We can either provide one-off project services or ongoing managed IT services.

We pride ourselves on providing great value for money, with a knowledgeable and friendly team who can quickly and efficiently sort your IT challenges as they arise today and in the future, including:

Professional / Project Services

- Architecture and design
- Cloud transition and management
- Cyber and enterprise security
- Programme and project management
- Data & storage setup and management
- Monitoring, analytics, automation
- Digital transformation planning
- Engineering – network, server, storage, etc

Managed Services

- Service Desk and User Support
- Infrastructure Management
- Managed Secure Networking
- Managed Backup
- Procurement / Asset Management
- Cloud Management
- Hardware-as-a-Service
- Security-as-a-Service

Understanding your business goals

- Our consultants work with your internal teams, reviewing how your organisation operates and the wider eco-system you work in, including suppliers, contractors and partners.
- There is no such thing as one size fits all, so by understanding how you work means we can get it right first time.

Work with and enhance, or upgrade what you already have in place

- It's likely you'll already have people, systems and processes in place. Our team will take those into account and knowing the goals you have in mind, optimise your investment to date, whilst introducing new tools and processes to ensure your technology enables your business for years to come. Tailored for best fit!

Review of recommendations and options

- Using plain English, you'll be taken through the recommendations with an eye on minimising any disruption and maximising business benefits while cost effectively answering all your technology needs.
