

# Access Control

[opticsecuritygroup.com](http://opticsecuritygroup.com)

## KEEP YOUR BUILDINGS AND ASSETS SAFE WITH INTEGRATED ACCESS CONTROL

You need to know the right people have access into the right places at the right times across your premises. Quality access control is one of the most reliable ways to protect your people, information and assets.

Optic can design an access control system that enables you to manage and monitor access including restricted areas. We have specialist licensing and are trusted partners to defence departments and government departments across Australia and New Zealand. Our Optic Auckland branch is our centre of excellence for Quality Assurance ISO9001, and we also have ISO14001, OHSAS 18001 and TYPE1A accreditations.

## CARDS, SMART PHONE APPS, BIOMETRICS - CHOOSE WHAT WORKS FOR YOU

Whether it's gates, doors, car-parks, rooms or stairways, if you need to regulate access to your premises Optic can design a system to suit that can also include an audit trail and documentation trail of who was where and when – all via re-programmable cards doing away with the need for keys and other costly hardware.

Access control systems can also be integrated across multiple systems including your HR databases, intruder systems, door lock management and video surveillance giving you a holistic picture and greater control of people movement around your buildings.

## WIDE RANGING BUSINESS BENEFITS

- No more lost or duplicated keys!
- Protection for your employees from unauthorised visitors
- Activity monitoring and reports – keep tabs on who was where and when
- Remote access control and controlled times for when you can't be there
- Energy management – unoccupied building room lighting and HVAC control

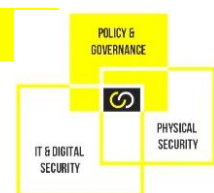

## WORK WITH AUSTRALASIA'S LARGEST CONVERGED SECURITY PROVIDER

Optic Security Group are Australasia's leading converged security providers with over 1000 customers, working with Government, Commercial and Defence organisations. Optic provide Access Control as a standalone offering or as part of an enterprise wide security and IT services portfolio.
