

## Video Conferencing

Optic Digital are the logical choice for video conferencing. Our breadth and depth of IT expertise means video conferencing can be part of a wider IT strategy, or we can apply our knowledge to simply create great video conferencing for you!

## Logitech with Microsoft Teams

We've partnered with Logitech and Microsoft to bring you a fully integrated conferencing solution.

We combine the Logitech Tap, Rally and Meetup product lines with Microsoft Teams. This builds on the great Microsoft collaboration and productivity tools you're already using. Our solution ensures you have high quality, but simple to use hardware, that makes people want to video conference!

### Key features

- In our opinion, the easiest to use and best integrated conferencing hardware on the market.
- An enterprise-ready solution at a very competitive price - ready for any size room and any size business.
- Fully Integrated with Microsoft Office 365 Exchange Online and Teams.
- Automatically shows calendar appointments, enabling a truly one-touch conferencing connection.
- Enables employees to collaborate across departments, locations, and other organisations.
- Licensing already covered as part of your Microsoft Office 365 licensing.
- Implementation costs are low compared with other solutions.

## Small-Medium Meeting Room

This solution is great for meeting rooms of up to six people, which makes it just right for keeping virtual teams in contact and branch offices talking.

### Included:

- Logitech Meetup Package
- All-in-one conference camera, 4K ultra HD with 5x HD zoom - speakers and microphone built in
- Intel NUC conference computer
- Logitech Tap touch controller
- Beamforming microphone array for accurate sound
- Motorised pan/tilt lens
- Flexible mounting options for all components
- Pre-configured for Microsoft Teams

From \$190 per month\*
